Forecast for Tuesday 12 Nov 2024

Weather: A dry day after a chilly start, with bright or sunny spells at first. However, isolated valley fog patches which formed overnight will only slowly clear during the morning. Sunny spells reducing, with cloud increasing as the day goes on. Feeling rather cold on the tops in a light to moderate northeasterly breeze. Fog re-forming in valleys during the evening.

Chance of cloud-free hill tops above 800m: 90% becoming 70%.

Low Cloud and visibility: Very good or excellent visibility away from cloud. Any early fog patches in the valleys slowly lifting and breaking, giving temporary reductions in visibility. Patches of cloud with base 600-800m developing during the day, giving very poor visibility in cloud.

Meteorologist's View

Feeling particularly chilly when exposed to the wind.

Forecast for Wednesday 13 Nov 2024

Weather: Overnight fog patches in the valleys will gradually disperse in the morning. A chilly start. Dry through daylight hours with bright or sunny spells, turning cloudier from the north from late afternoon, perhaps with the odd spot of light rain or drizzle later.

Maximum wind: North or northeast 15-20mph.

Chance of cloud-free hill tops above 800m: Near 100% through daylight hours, perhaps reducing to 30% later in the afternoon.

Low Cloud and visibility: Summits generally cloud free until late afternoon. Cloud then spreading from the north with bases reducing to around 400-600m later. Generally very good visibility for much of the day, but likely to become very poor at times across summits through the evening, especially in any patches of light rain or drizzle.

Temperature: **Valleys:** Zero Celsius, rising to Plus 8 Celsius.
At 800m: Plus 3 Celsius rising to Plus 6 Celsius
Freezing level: Above summits.
